

THE BASICS OF REGISTERING A PARTBRED STANDARDBRED HORSE.

These basic guidelines have been developed in conjunction with the Rules detailed in the

Non-Racing Stud Book Standardbred NRS Standardbreds and Partbred Standardbreds 2nd Edition 2020

managed by the Standardbred Horse Association of Australia Inc. (SHAA).

This is the only program, approved by Harness Racing Australia, for the registration of partbred Standardbred horses in Australia.

To register a purebred Standardbred horse that is bred for pleasure and/or performance other than harness racing and, more importantly, a horse that will not be freeze branded OR a **partbred Standardbred**, owners are required to verify the bloodlines via DNA testing which is done in accordance with Harness Racing Australia's guidelines and provision. Once DNA confirmation is received these horses will be registered in either the Non-Racing Stud Book Standardbreds (NRS Standardbreds) or the Partbred Standardbred register, also managed by the SHAA.

For a partbred Standardbred horse:

Confirmation of at least 25% Standardbred bloodlines is required to register a partbred Standardbred horse. Without this registration the horse will be unable to compete as a partbred Standardbred in any equine activity within Australia.

For a partbred Standardbred horse that carries 50% Standardbred bloodlines: if you have access to the sire or dam that is the purebred Standardbred, freeze branded after 2002, the steps required are:

- 1 The owner joins their State's SPPHA group (SAQ in Queensland).
- 2 The owner pays a horse registration fee for the horse they wish to register as a partbred Standardbred and signs acceptance of being required to make the relevant collections and payments. An interim horse registration will be issued to the owner, but the horse will not be able to be shown or competed until DNA certification has been secured.
- 3 The local SPPHA group forwards a copy of the horse registration form to Maree Lund, from the SPPHAV and SHAA who, working with Harness Racing Australia, determines whether a DNA sample will be required from the purebred sire and / or dam.
- 4 The owner pays the \$80 fee for the DNA testing of all (1 or 2) horses that are not currently DNA recorded. These fees are to be paid direct to the SHAA bank account or forwarded to SHAA, with a payment cheque, to PO Box 57, Yea, 3717. NOTE: If the DNA matching requires going back to a grandparent or another related horse, the fee is \$135.
- 5 Once the DNA fees have been received by the SHAA, the owner of the horse that is to be registered as a partbred Standardbred will be sent a kit for each horse from which a sample is to be collected – with an instruction sheet.
- 6 The owner secures access to the horse(s) for the taking of the DNA samples by a member of their state's SPPHA Committee or has their Vet to do so. Form(s) and DNA kit(s) will be sent for this. Any expenses (vet fees) will be met by the owner of the horse to be registered as a partbred Standardbred.
- 7 All DNA samples and the signed paperwork are then posted to the SHAA c/- PO Box 57, YEA, 3717. for the preparation of the necessary information to accompany the samples when sent to HRV for forwarding to the overseas testing laboratory. Samples are sent off with other Harness Racing DNA samples so there may be a delay before these sample(s) are sent to the laboratory.

THE BASICS OF REGISTERING A PARTBRED STANDARDBRED HORSE.

- 8 Once verification is received the partbred Standardbred shall be registered with the State SPPHA and issued with a horse registration card verifying its certification and the owner will be able to commence showing it. A copy of the certificate received from the laboratory is also provided to the owner and to the state SPPHA group. If confirmation is not available the horse registration fee will be refunded by the state group, but not the membership or the DNA fees and the horse will be ineligible for showing in any Standardbred ring or competing as a partbred Standardbred in any equine event in Australia.

Any potential partbred Standardbred horse registration that does not fall into the basic guidelines above will require discussion with Maree Lund from the Standardbred Pleasure and Performance Horse Association of Victoria Inc. – also, Secretary of the SHAA.

Maree Lund is happy to speak with any owner wishing to register their partbred Standardbred horse prior to taking the first step of applying for registration with the state SPPHA group. Maree can be contacted at memberships@spphav.org.au

Contacts for the respective state Standardbred Pleasure Organisations are:
